QUICK INSTRUCTION GUIDE

D29-ASS | SHAPE & STRAIGHT CUTTING SNIPS

Quick operating instructions • Keep this sheet for reference

PURPOSE	MODEL D29-ASS
Manual snips for continuous straight and curved cuts in sheet metal. Compact head gives precise control for shape cutting.	ERGO handles; optimized leverage and non-serrated, slip-resistant cutting edges.

BEFORE YOU START

- Check blade edges, pivot, handles and locking mechanism for damage.
- Wear eye protection and cut-resistant gloves; secure the workpiece.
- Mark the cut; verify sheet metal is within rated cutting capacity.

HOW TO USE

1. Choose the right-cutting or left-cutting version to suit the intended curve.
2. Secure the sheet metal and clearly mark the straight or curved cutting path.
3. Inspect the snips and release the handle latch before beginning the cut.
4. Position the compact cutter head at the sheet edge along the marked line.
5. Squeeze the ergonomic handles steadily; let the blades cut without forcing.
6. Advance along the path, guiding the head through curves with small adjustments.
7. For continuous cuts, maintain control and avoid twisting or prying the blades.
8. Finish the cut; inspect the edge for burrs and deburr when necessary.
9. Remove offcuts, wipe the blades clean and secure the handles for storage.

IMPORTANT SAFETY NOTES

- Cut metal and offcuts are sharp; keep hands away from the cutting edges.
- Never exceed rated thickness; do not use snips as pliers or pry tools.
- Control the free cut strip and prevent debris from injuring others.

CARE AND STORAGE

Remove offcuts, clean blades and pivot, inspect for wear and store dry.

SPECIFICATIONS

Versions: Right cutting D29ASS-2; left cutting D29ASSL-2.
Overall length: 260 mm (10-1/4"); blade length: 33 mm (1-5/16").
Rated sheet thickness: 1.2 mm at 600 N/mm²; weight: approx. 0.51 kg.
