MASC AKZ1 Sheet Metal Marking Pliers

Precision layout tool for multiple bend reference marks in one operation

OVERVIEW

The MASC AKZ1 Marking Pliers establish multiple bend reference points in sheet metal with a single press. Three adjustable marking tips, an integrated measuring scale and a foldable stop help create consistent layouts for underlap and overlap connections, particularly for folded façade panels and cassettes.

KEY FEATURES

- Creates multiple bend marks in a single operation
- Three adjustable marking tips
- Integrated measuring scale for repeatable setups
- Foldable stop supports accurate positioning
- Marks underlap and overlap bend references
- Helps avoid double-sided marking and sheet turning

TECHNICAL SPECIFICATIONS
