MASC BK1/II Sheet Metal Nibbler

Hand-operated nibbler for clean sheet metal notches and seam details

OVERVIEW

The MASC BK1/II sheet metal nibbler creates precise relief notches in roof and façade sheet metal before forming a Bündner seam. Its compact head and spring-assisted operation help prevent tearing, reduce burrs and allow controlled cutting close to corners.

KEY FEATURES

- Cuts steel sheet up to 0.7 mm thick
- Clean notching with reduced burr formation
- Designed for relief cuts before seam compression
- Cut depth adjustable through repeat cutting
- Compact head reaches close to corners
- Ergonomic, spring-assisted handles

TECHNICAL SPECIFICATIONS

PRODUCT	BK1/II Sheet Metal Nibbler
MAX. STEEL THICKNESS	0.7 mm (approx. 22–23 ga)
DIMENSIONS	230 × 18 × 115 mm
TOOL WEIGHT	0.29 kg (0.64 lb)
OPERATION	Manual, spring-assisted
USE	Profile notching before seam forming
