MASC FMK Plastic Fold Chisel

Protective seaming and finishing tool for coated sheet metal

OVERVIEW

The MASC FMK Plastic Fold Chisel is designed for forming and finishing 10 mm rebates while helping to prevent damage to coated and pre-finished sheet metal. Its elongated handle provides comfortable control during seam work.

KEY FEATURES

- Helps protect coated metal surfaces
- Suitable for pre-weathered zinc
- For pre-patinated copper and aluminum
- Long handle for controlled use
- Designed for a 10 mm finished rebate
