MASC SGZSK Standing Seam Panel Alignment Clamp

Product Specification Sheet

OVERVIEW

The MASC SGZSK Standing Seam Panel Alignment Clamp is designed to help align adjacent standing seam metal panels during installation. Its locking clamp design helps hold panels in position for accurate fit-up and easier handling on the jobsite. The tool features protective contact surfaces and durable metal construction for reliable use in sheet metal work.

KEY FEATURES

- Helps align adjacent standing seam panels during installation
- Locking clamp mechanism for secure positioning
- Adjustable clamping pressure via threaded screw
- Protective jaw pads help reduce marking on panel surfaces
- Durable metal construction for professional sheet metal use
- Made in Germany
