QUICK INSTRUCTION GUIDE

1022 | CLIPPER

Quick operating instructions • Keep this sheet for reference

PURPOSE	MODEL 1022
Cordless sheet metal cutting tool for clean cuts along straight and curved lines with variable cutting speed.	Hardened steel cutting wheels, bottom roller assembly, and optional guides.

BEFORE YOU START

- Inspect the Clipper and cutting wheels. Confirm the material thickness is within WUKO’s rated capacity.
- Wear safety glasses and suitable cut-resistant gloves when handling sheet metal.
- Support and secure the sheet metal; use a charged compatible battery.

HOW TO USE

1. Place sheet metal on a stable, supported surface and mark the cutting line. Check material thickness.
2. Install a charged battery and inspect the cutting wheels for cleanliness, alignment, and damage.
3. Align the Clipper’s cutting wheels at the sheet edge with the marked line. Use an optional guide for parallel cuts.
4. Activate the cordless drive and gradually adjust cutting speed to suit the material.
5. Guide the tool steadily without forcing it. For curved cuts, maintain a minimum radius of 20 in (500 mm).
6. For long or tapered sheets on the floor, use the bottom roller assembly to help the tool move smoothly.
7. Release the drive control after cutting. Wait for the wheels to stop, then carefully remove the cut pieces.
8. Remove the battery before cleaning, adjustment, or storage. Put the tool and accessories in the carrying case.

IMPORTANT SAFETY NOTES

- Keep hands clear of cutting wheels and moving parts; secure loose sheet metal.
- Do not force the tool or exceed the manufacturer’s material-specific cutting capacity.
- Sharp cut edges can cause injury; remove the battery before maintenance or adjustments.

CARE AND STORAGE

Remove metal debris safely, keep the wheels clean, remove the battery, and store the Clipper and accessories in its case.

SPECIFICATIONS

Minimum cutting radius: 20 in (500 mm). Drive: Cordless, variable speed.

Accessories: Bottom roller assembly and optional adjustable guide. Check WUKO for rated capacities.

HELP AND REFERENCE

Manufacturer instructions: Consult the official WUKO 1022 manual. Customer support: rapidmaterials.com

IMPORTANT: This quick reference is not a replacement for WUKO manufacturer instructions. Verify cutting limits, correct battery handling, and model-specific procedures before use.
