WUKO 0410 Sprinter

Lock seamer for single- and double-lock standing seam

OVERVIEW

The WUKO 0410 Sprinter is a self-propelled lock seamer designed to close single-lock and double-lock standing seams without changing forming rollers. Its variable pressure adjustment, forward and backward run, and two working speeds help installers achieve fast, consistent seam closure on straight and curved standing seam panels.

KEY FEATURES

- Closes single-lock and double-lock standing seams without changing rollers
- Forward and backward run with variable pressure adjustment
- 120 V version only on this sheet
- Seam height options: 1 in or 1 1/2 in
- Two working speeds: 23 or 40 ft/min
- Suitable for curved panels: convex 32 in min radius, concave 48 in min radius

TECHNICAL SPECIFICATIONS

MODEL	WUKO 0410 Sprinter
TOOL TYPE	Self-propelled lock seamer
SEAM HEIGHT	1 in or 1 1/2 in
STANDARD VOLTAGE	120 V
POWER RATING	720 W
WORKING SPEEDS	23 or 40 ft/min
WEIGHT	42 lb
