WUKO 1004928
Wedge-Shaped Hammer

Precision soft-face hammer for sheet metal forming

OVERVIEW

The WUKO 1004928 Wedge-Shaped Hammer is designed for controlled forming and adjustment of sheet metal details. Its broad, tapered plastic head concentrates force along edges and seams while helping protect coated and finished surfaces. The wooden handle offers comfortable handling for detailed roofing and fabrication work.

KEY FEATURES

- Tapered wedge head for focused manual forming
- Plastic striking surfaces help reduce surface marking
- Useful for seams, folds, transitions, and narrow areas
- Wooden handle for controlled, comfortable grip
- Designed for sheet metal roofing and fabrication
- Manual striking tool for precision adjustments
