# WUKO 1004951
## Sheet Metal Hammer

Forged cross-peen hammer for sheet metal shaping and forming

## OVERVIEW

The WUKO 1004951 Sheet Metal Hammer is a traditional German-pattern hand hammer used for shaping, forming and finishing sheet metal. Its forged, hardened alloy steel head features a ground striking face and cross peen with chamfered edges for controlled detail work. A double-curved hickory handle provides a secure, balanced grip.

## KEY FEATURES

- German-pattern cross-peen design for metalworking
- Forged alloy steel head, hardened and tempered
- Ground face and cross peen with chamfered edges
- Corrosion-resistant black powder-coated head
- Secure SecuTec wedge-bolt head connection
- Double-curved hickory handle for controlled striking
