WUKO 1009026
Square Hammer

Soft-face hammer for shaping sheet metal without marring surfaces

OVERVIEW

The WUKO 1009026 Square Hammer is a hand tool designed for controlled forming and finishing of sheet metal components. Its soft non-marking hammer head helps deliver impact without damaging coated or finished surfaces, while the wood handle provides a comfortable grip and good control during shop or field work.

KEY FEATURES

- Soft-face hammer for shaping and adjusting sheet metal
- Non-marking white hammer head helps protect finished surfaces
- Wooden handle offers a comfortable grip and balanced handling
- Suitable for forming, seating, and finishing sheet metal details
- Simple durable construction for shop or job-site use
