WUKO 1026426
Soft Face Detail Hammer

Controlled non-marking hammer for detailed sheet metal work

OVERVIEW

The WUKO 1026426 Soft Face Detail Hammer is designed for precise manual forming and adjustment of sheet metal details. Its non-marking soft faces help reduce the risk of damaging coated or finished surfaces, while the compact hammer design provides good control for close-up detail work. The wood handle with grip sleeve offers comfortable handling for shop and job-site applications.

KEY FEATURES

- Soft-face detail hammer for controlled sheet metal forming
- Non-marking striking faces help protect finished materials
- Compact head design suited for precise detail work
- Wood handle with protective grip sleeve for comfort and control
- Useful for adjustment, seating, and forming of sheet metal components
- Ideal for roofing, flashing, and metal fabrication tasks
