

Wuko 4040 Disc-O-Bender Twist

Manual sheet metal hemming tool

OVERVIEW

The WUKO 4040 Disc-O-Bender Twist forms hems from 90° to 180° on inner and outer radii. Its twist-lock roller stop allows the tool to be placed onto a right-angle bend without extra side clearance and removed easily.

KEY FEATURES

- Forms hems from 90° to 180°
- For inner and outer radii
- No free side clearance required
- Twist roller stop using locking bolt
- Place tool on right-angle bend
- Twist roller stop back to begin
- Greater bending height than 4010
