

Wuko 4041 Disc-O-Bender Maxi Twist

Manual sheet metal bending and forming tool

OVERVIEW

The Wuko 4041 Disc-O-Bender Maxi Twist starts at 90° and bends up to 180° to create hems on inner and outer radii. Its twist-away roller stop allows the tool to be positioned directly onto an existing right-angle bend without needing free space at the side. The Maxi offers an 8–40 mm bending height.

KEY FEATURES

- Starts at 90° and bends up to 180°
- Creates hems on inner and outer radii
- No side clearance needed for installation
- Twist roller stop using the locking bolt
- Fits directly onto an existing 90° bend
- Extended bending height of 8–40 mm

TECHNICAL SPECIFICATIONS

MODEL	WUKO 4041
BENDING ANGLE	90°–180°
