Softface / Deadblow Hammers

Non-marking deadblow hammers for controlled sheet metal forming

OVERVIEW

The WUKO Softface/Deadblow Hammers are designed for controlled forming, seating, and adjustment of sheet metal details without damaging finished surfaces. These non-rebound hammers use hard plastic soft-face ends and wooden handles to deliver higher striking force with improved control, reduced noise, and less user fatigue. They are available in small, medium, and large sizes.

KEY FEATURES

- Available in three sizes: small, medium, and large
- Hard plastic soft-face ends help protect coated or finished surfaces
- No rebound design allows better hammer control and higher force
- Easily interchangeable nylon heads
- Gentle on the joints and low in noise
- Very wear-resistant, no chipping, with double curly hickory handle

TECHNICAL SPECIFICATIONS
